

CARE AND TREATMENT

Overall Focus:

Our goal is improving health outcomes for people living with HIV/AIDS.

Three Focus Areas:

- How can we make certain everyone who knows they are positive gets in care and stays in care?
- What are the barriers to effective treatment and how can they be reduced?
- Is the level of care currently provided adequate?

Tasks for meeting #2:

As a group, develop specific strategies for improving health outcomes for people living with HIV/AIDS.

1. How do we insure that we have trained physicians now and in the future and in the necessary locations?
2. How do we make the HIV system of care seamless upon diagnosis, between providers, easier to use for patients and thoroughly understood by all?
3. How can we improve our ability to handle the complex co-morbidities that often accompany HIV?
4. How can we make locations that provide HIV care “neutral” to the public and those infected with HIV?

Who needs to attend meeting #2:

Given this focus, who should be at the upcoming meetings?

- Community Service Organizations
- AIDS Service Organizations
- Sacramento County
- Hospitals and Clinics
- Doctors and Nurses
- Jail
- Recovery Centers
- College and Universities (Medical Programs)

Send your suggestions to Jon and invite the person yourself.
