

Major Goals of the Strategic Initiative

Our Vision: No new infections of HIV in 5 years.

- **People know their HIV status and early diagnosis is the norm.**
- **Behaviors that lead to HIV infection are understood by all.**
- **All communities are open and accepting of people with HIV/AIDS.**
- **The disproportionate impact of HIV/AIDS among social and ethnic minorities, specifically gay men, African Americans, and Latinos, is a priority.**
- **Funding is sufficient for services needed by people with HIV/AIDS.**
